

Just to see the plumeholders

Just to see the plumeholders

Here you can see the mechanism to clip the mask into the helmet

Small spirals curls **elevated/**
embossed

If not too complicated I would
like to have this mask

A modern reconstruction in brass

An original from 4th cent BC found in Vitsa Epirus

Here you can see the plumeholders better than at the modern reconstruction above

This is the helmet I would like to have; made from 1,2 mm thick brass
